To those who guard our trust in fairness to the people of South Carolina .

We wish to protest in earnest to the asked rate increases by SCE&G .We feel at this time when our economy is at it's worst and South Carolina's unemployment one of the highest in the nation that these rate increases are unjustified and cruel to our people .In the face of vast belt tightening by the people we feel that SCE&G should be responsible and find ways to do the same .Why are rates vastly cheaper from other electrical providers for the same kilowatt hours usage ? Please PUBLIC SERVICE Commission of South Carolina do not allow these monopolizing entity to wreak hardships on the people of this state .SCE&G SHOULD account to it's customers an accountability for their funds extracted from services from our people Where new projects and improvements are bettering our services and benefits to our lives .Seems as if a strong wind blows our electric is out of service causing havoc to all services connected to power .WE THE PEOPLE beseech this Commission to look hard at SCE&G's demand for more money and please with good conscience and the compassion to this great States people say no to these crippling and hardship furthering belt tightening effects THAT these increases will cause .I know I could back up these actuations with a multitude of facts and figures but I am asking you this Commission to turn over the stones of inquiry and bring to the light of day the reasons for the shortfalls of this company SCE&G to ask the people to bale them out for their mismanagement .For WE the people have only you the PUBLIC SERVICE COMMISSION OF SOUTH CAROLINA to stand for us

CONSERNED CITIZEN OF SOUTH CAROLINA and customer of SCE&G
